### Skills

- Angular
- React
- NestJS

### Experience

Since starting my journey as a web developer 3 years ago, I've done remote work for agencies and startups, and collaborated with talented individuals to create products for commercial and consumer use.

I create successful responsive websites that are fast, easy to use and built with best practices. The main area of my expertise is FRONTEND development working with HTML5, CSS3, JS, for small to medium sized websites. For web applications I use the power of frameworks like Angular and React.js for creating small, medium and large web applications.

I also have experience as a BACKEND developer working with Node.js, PHP using frameworks like NestJS, Codeigniter and .NET CORE.
